DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the **upper and lower ends, lateral side, the second step, first and second protrusions** must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms which are not clear, concise and exact. The specification should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph. Examples of some unclear, inexact or verbose terms used in the specification are: the disclosure is written in very confusing manner since applicant uses different terminology which are not consistent throughout the disclosure. Therefore, it is not clear what elements applicant is referring as an upper and lower ends, connecting means, second step, first and second protrusions.

Allowable Subject Matter

Claims 12-20 appear drawn to allowable subject matter but final determination will be made after all objections and 112 matters have been corrected.
